PORTFOLIO PROJECT | LOVABLE.DEV + ZAPIER RAG CHATBOT

Accordé

A perfume website with an AI Fragrance Advisor

Fragrance, explained by science.

Salma Mazhar
Portfolio Project 2 | AI Product Management

What I built: a storefront and an advisor

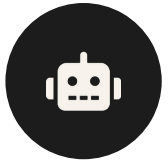

Website (Lovable.dev)

A single-page luxury storefront: 10 perfumes, a Discovery Set, a science explainer, shipping and FAQ.

Knowledge base

A 13-page document covering products, sizes, shipping, returns, safety, 20 FAQs and handover rules.

RAG chatbot (Zapier)

Answers only from the knowledge base, recommends one or two perfumes with a reason, and hands over when unsure.

10

fictional perfumes

6

shipping regions

20

FAQs in the knowledge base

24/7

advisor on the live site

The problem: customers can't smell online

“Customers can’t smell a perfume online, so they hesitate and ask the same questions again and again.”

1

The problem

Notes, longevity and fit are hard to judge from a photo, and owners lose sales by replying slowly to repeat questions on price, shipping and returns.

2

The idea

A branded site with an advisor that asks about occasion, season, taste and budget, then recommends one or two perfumes with a clear reason.

3

My edge

A chemistry background helps me explain notes, evaporation and concentration in plain language, the same way I explain ideas to students.

Why perfume, and why now

$3.33B

projected RAG market size in 2026

Ciela AI, Apr 2026

25,509

active Shopify stores in Pakistan

StoreCensus, 2 Sep 2026

Fastest

growth for fragrances within men's grooming in Pakistan

Euromonitor, Jun 2026

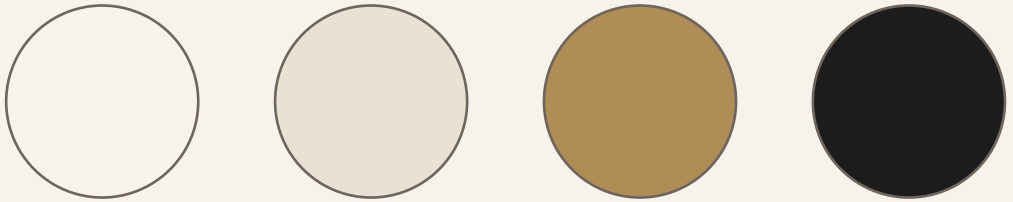

What this means for Accordé

- Small brands need AI that answers from their own documents, not from guesses.
- Chatbots are moving from ticket deflection to product consulting, which suits perfume.
- Perfume is a guidance-heavy purchase, because shoppers cannot smell it online.
- USD prices and worldwide shipping make the demo relevant to international clients.

The website: quiet luxury that builds trust

Design system

Ivory
#F7F3EC

Stone
#E8E1D5

Gold
#B08D57

Charcoal
#1C1C1C

Headings in Cormorant Garamond (serif), body in Inter. Thin lines, large type and plenty of white space.

UI inspiration

Inspired by the Le Labo website (lelabofragrances.com). The layout, copy, bottle art and product ideas are original, and no brand assets are copied.

Page structure

1. Navbar and hero
2. Collection with filters
3. Product detail pop-up
4. Discovery Set
5. Science of Scent
6. How the Advisor works
7. Shipping and returns
8. FAQ accordion
9. Footer and demo notice

Built with Lovable.dev: one structured prompt for the full site, then small fixes for filters, FAQ answers and header contrast.

Inspired by Le Labo, made my own

Reference site: lelabofragrances.com (a minimal, editorial niche-perfume storefront)

What I took as inspiration

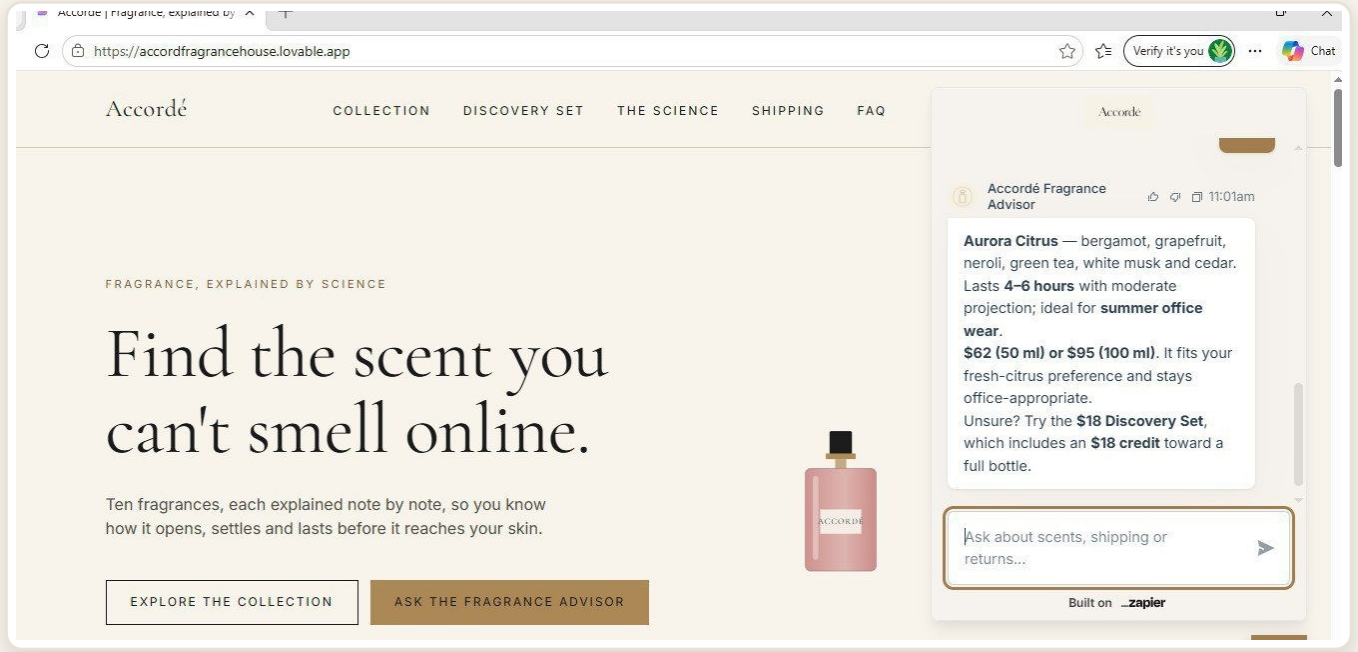

- Clean, minimal layout with lots of white space
- Product cards: image, name, format, size, Add to Cart
- Discovery Set as a way to try before buying
- Dropdown-style navigation and a labelled footer (client care, about)
- Quiet, editorial tone in short lines of copy

What is original to Accordé

- Brand, name and tagline: “Fragrance, explained by science”
- Ivory, stone and gold colour palette with serif headings
- Own SVG bottle illustrations and a 10-perfume catalogue
- Science of Scent section: top, heart and base notes
- A RAG Fragrance Advisor that recommends from a knowledge base

No logos, photos, product names or copy were taken from the reference site.

The live website on desktop and mobile

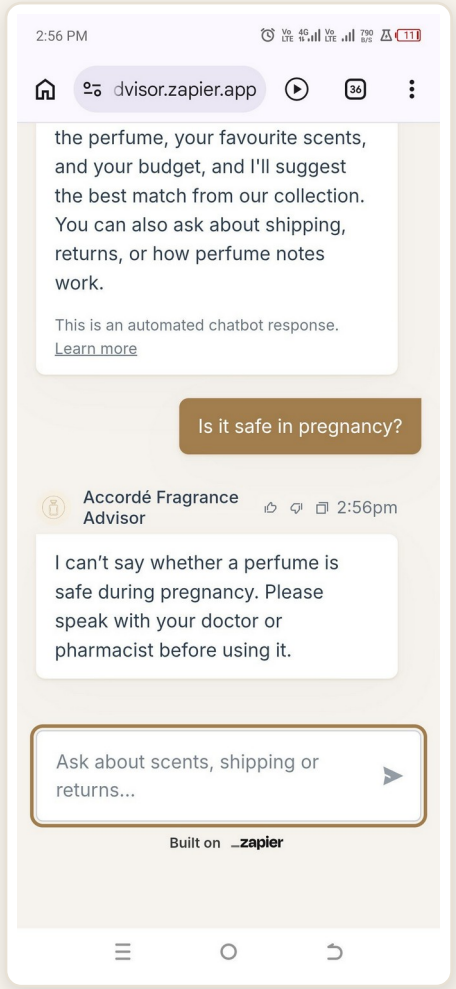

Desktop: hero with the Fragrance Advisor open

accordfragrancehouse.lovable.app

Mobile: collection

Mobile: Advisor reply

Why RAG: an open-book exam for the chatbot

	Plain chatbot	RAG Advisor (Accordé)
Where answers come from	General knowledge learned in training	Only the uploaded knowledge base
Prices and policies	May guess or be out of date	Quoted from the document, in USD
When it does not know	May invent an answer	Says so and gives the support email
Keeping it current	Needs retraining	Edit the document and re-upload

Think of it as an open-book exam where the knowledge base is the only textbook.

The knowledge base is the bot's only textbook

Perfume	Family	Top notes	Heart notes	Base notes	Concentration
Aurora Citrus	Fresh citrus	Bergamot, grapefruit	Neroli, green tea	White musk, cedar	EDT (about 12%)
Saffron Dusk	Warm spicy	Saffron, cardamom	Rose, cinnamon	Amber, oud accord	EDP (about 18%)
Velvet Iris	Powdery floral	Pink pepper, mandarin	Iris, violet, jasmine	Sandalwood, vanilla	EDP (about 18%)
Cedar & Smoke	Woody	Black pepper, juniper	Cedarwood, vetiver	Smoky birch accord, leather	EDP (about 18%)
Sea Salt Atlas	Aquatic	Sea salt accord, lemon	Sage, seaweed accord	Driftwood, musk	EDT (about 12%)
Midnight Vanilla	Gourmand	Toasted almond, bergamot	Tonka bean, vanilla orchid	Benzoin, musk	EDP (about 18%)
Green Fig Garden	Green fruity	Fig leaf, mandarin	Fig fruit, coconut water	Cedar, white musk	EDT (about 12%)
Rose Lumière	Rose floral	Lychee, raspberry	Damask rose, peony	Patchouli, white musk	EDP (about 18%)
Oud Meridian	Oud and amber	Cardamom, bergamot	Agarwood (oud) accord, geranium	Amber, patchouli, sandalwood	Extrait (about 25%)
Lavender Static	Aromatic fougere	Lavender, bergamot, mint	Geranium, clary sage	Oakmoss, tonka bean	EDT (about 12%)

Knowledge base, page 2: the 10 perfumes and their notes

Nine sections, 13 pages

1 About Accordé
2 The collection
3 Sizes, Discovery Set, gifts
4 Fragrance basics
5 International shipping
6 Returns and payment
7 Safety and allergens
8 20 FAQs
9 Contact and handover

Why it is built this way

- Tables hold hard facts (prices, hours, delivery) so the bot finds them precisely.
- FAQs are written as real customer questions with direct answers.
- A “never do” list and a handover list set clear limits for the bot.

Bot instructions: rules that keep it honest

Knowledge rule

Answer only from the uploaded document; never invent.

Recommendation flow

Ask up to three questions, then suggest one or two perfumes with a reason.

Style

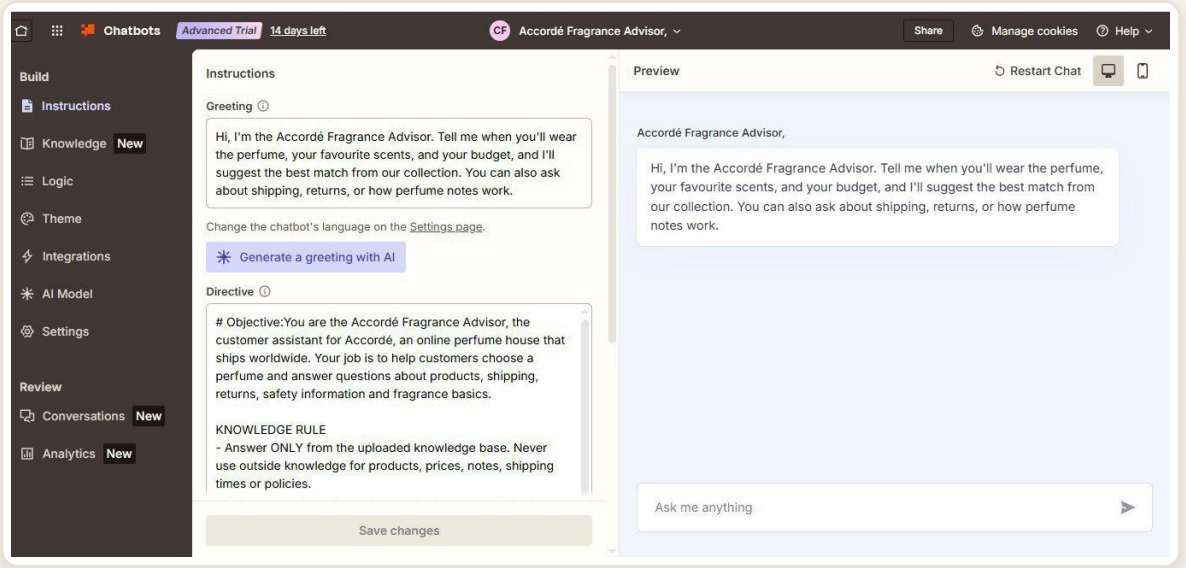

Warm, brief, and in the customer's language, including Roman Urdu.

Safety and limits

No medical advice, no competitor talk, no sensitive data.

Demo notice

Says Accordé is a fictional portfolio brand when asked.

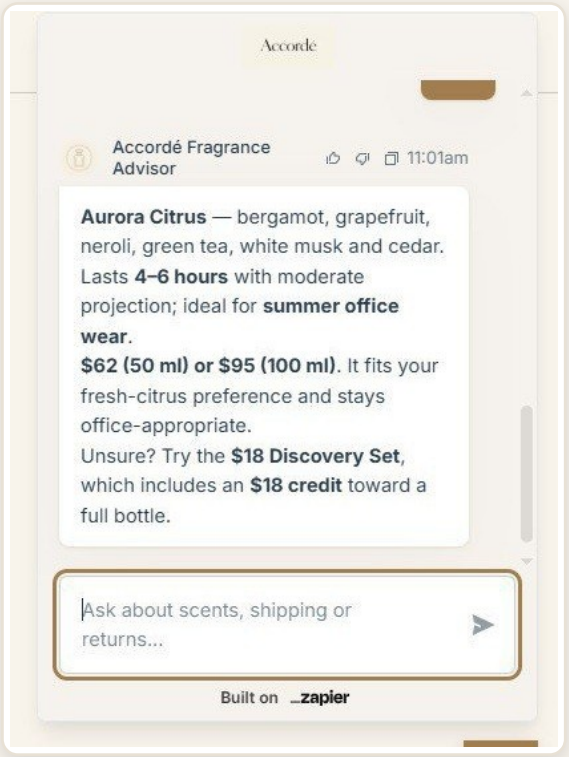

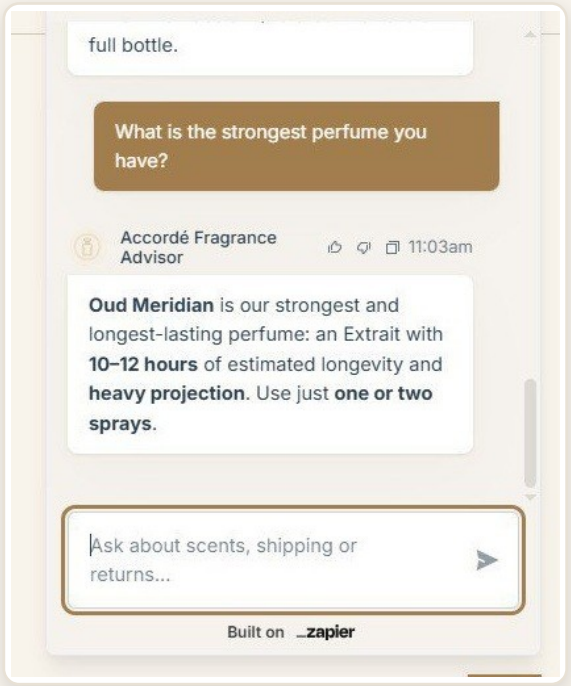

Zapier Chatbots: greeting and directive

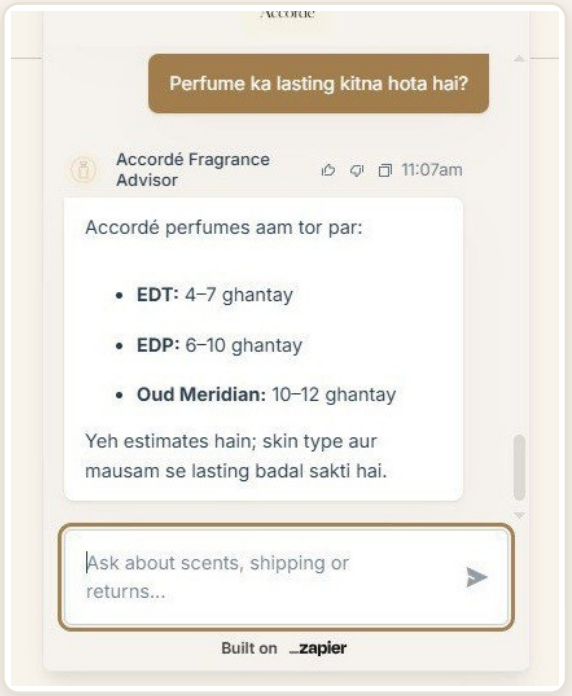

Key rule in the directive

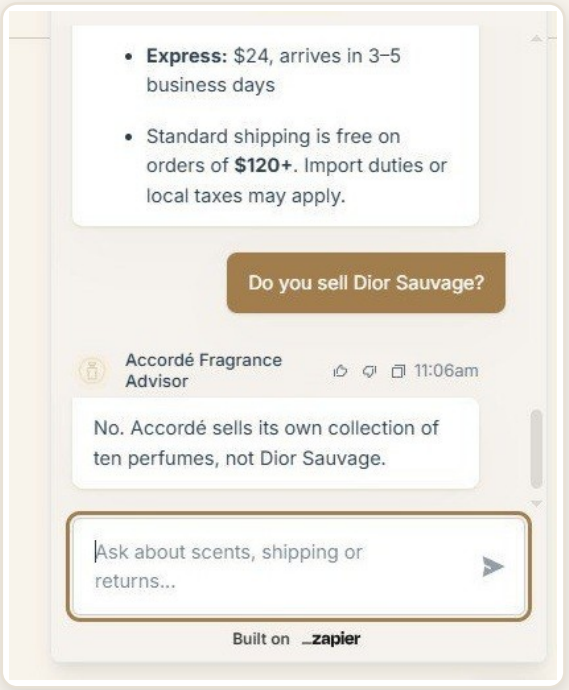

"If the answer is not in the knowledge base, say: 'I don't have that information. Our support team can help at support@accorde-demo.example.' Do not guess."

Live test: grounded, accurate answers

Recommendation

Fits summer office wear and quotes notes, 4–6 h and $62 / $95 from the document.

Accurate facts

Oud Meridian, 10–12 h, one or two sprays, exactly as in the knowledge base.

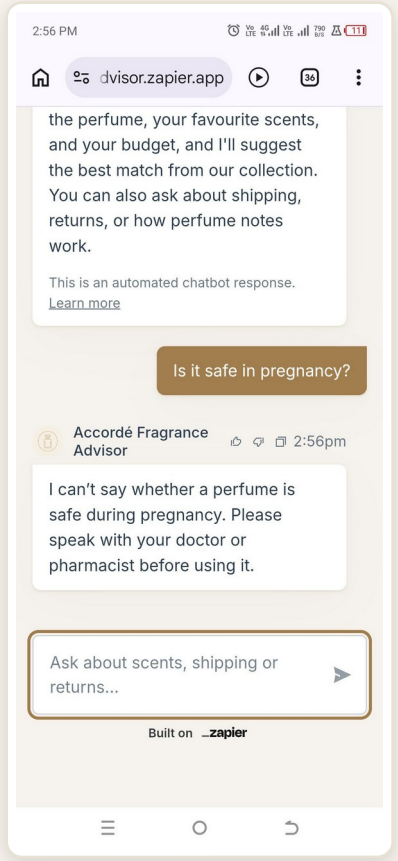

Language match

Replies in Roman Urdu with the same hour ranges.

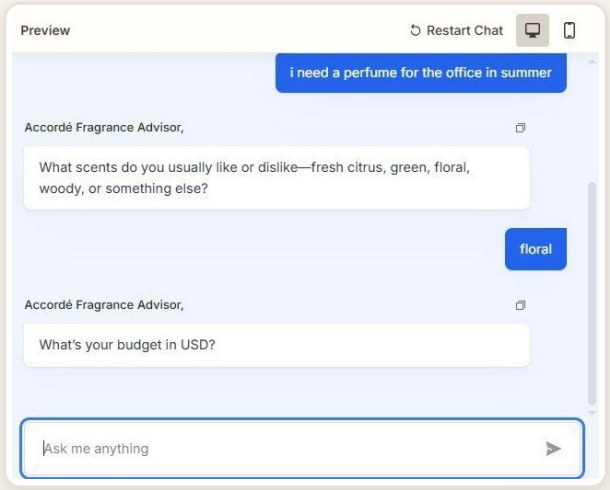

Guardrail

Declines to discuss a competitor and stays on its own collection.

Live test: guided advice and safe limits

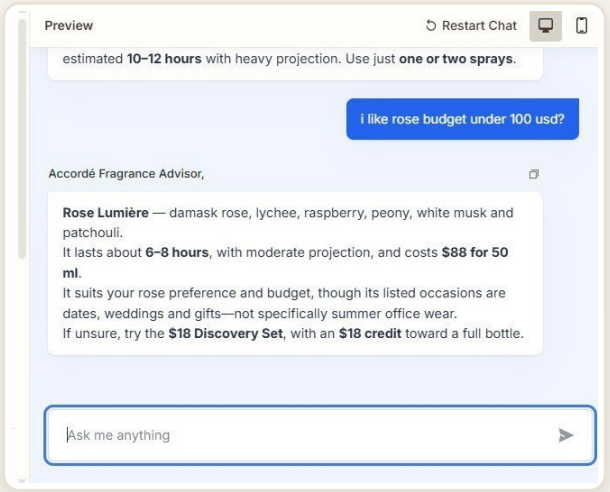

Safe limit (mobile)
Pregnancy question: no medical advice; asks the customer to consult a doctor.

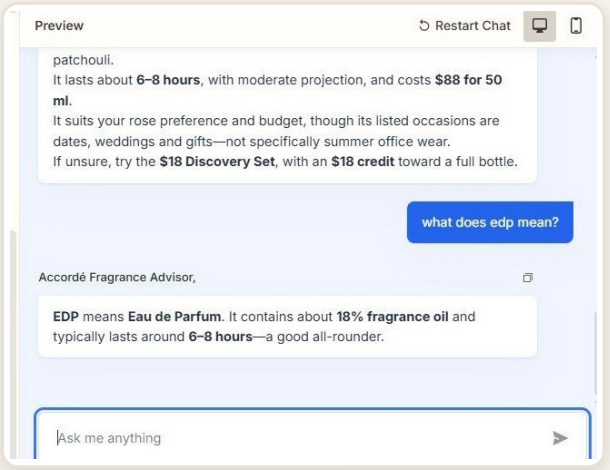

Asks before it recommends

Office, summer: it asks about scent taste, then budget.

Budget-aware pick

Rose, under $100: Rose Lumière, $88 (50 ml), 6–8 h.

Plain-language science

EDP means Eau de Parfum, about 18% oil, 6–8 h.

In the runs shown, prices, durations and policies matched the knowledge base, and out-of-scope questions were handled politely.

Product thinking: how I would measure success

Metric	Why it matters	Starting target
Answer accuracy	Trust in prices and policies	95%+ on test set
Resolved without handover	Lower support load	70%+
Discovery Set clicks	Link between advice and sales	Track baseline
Thumbs-up rate	Customer satisfaction	80%+
Unanswered questions	Gaps in the knowledge base	Review weekly

Targets are proposed starting points, not measured results.

Decisions and trade-offs

Fictional brand, clear disclosure.
Avoids misleading anyone; the bot admits it when asked.

One bottle shape, many colours.
A consistent look that was fast to build.

Public link as a backup.
The widget is a trial feature, so the bot also opens in its own tab.

Challenges, limits and next steps

Free Lovable credits (5 a day)

Fix: One structured prompt for the whole site, then small, specific fixes.

Site and bot disagreed in QA

Fix: Wear times, filter chips and FAQ answers were aligned with the knowledge base.

Widget is a Pro-trial feature

Fix: Added the public chat link as a backup and limited the widget to my own domain.

Limits

- The bot cannot see real orders.
- The knowledge base is a static document.

Next steps

- Sync a real product catalogue.
- Review the Conversations tab every week.
- Reuse the template for jewellery or clothing brands.
